

Moving your baby from liquid to powdered Nutriprem 2 formula

Neonatal Service

Information for Patients

Produced: August 2020

Review: August 2023

Leaflet number: 1035 Version: 1

What is Cow & Gate Nutriprem 2?

Cow & Gate Nutriprem 2 is a formula that has been designed for preterm infants. It provides extra nutrition in order to help preterm babies with catch-up growth, and can be used to feed your baby up to about 6 months corrected age. This is a prescription only formula and will be prescribed by your GP.

Nutriprem 2 formula is available as ready-to-feed liquid formula (used in hospital) and powdered formula (to be used at home).

You have been given this leaflet as your baby is due to go home on Nutriprem 2 formula. A slow change from ready-to-feed liquid formula to powdered formula is known to help prevent tummy upsets. This leaflet will help you understand this change.

Ready-to-feed 90ml bottle
(Available in hospitals only)

Powdered 800g tin

Changing from ready-to-feed liquid formula onto powdered Nutriprem 2 formula

When your baby is ready to be discharged home from hospital, you will be given 28 ready-to-feed 90ml bottles of Nutriprem 2 and one 800g tin of Nutriprem 2 powder. Follow the steps below to help your baby change from the liquid formula onto the powdered formula:

- Once you are home, aim to introduce 1 bottle of powdered formula a day, with the remaining feeds to be given as ready-to-feed liquid formula.
- Each day, increase powdered formula by 1 bottle until your baby is on all feeds of powdered formula. For example, if your baby has 7 to 8 feeds a day, this should take at least 1 week to achieve.

Example:

The table below gives an example of how you can make the changeover if your baby has 8 feeds a day:

Day at home	Number of feeds	
	Ready-to-feed liquid formula	Powdered formula
1	7	1
2	6	2
3	5	3
4	4	4
5	3	5
6	2	6
7	1	7
8	0	8

Contact details

If you have any issues or concerns with making the change, please contact your neonatal outreach nurse, dietitian or visit your GP:
