Introduction

You will have a key worker (nurse specialist) who is a member of the healthcare team looking after you. They will ensure that you, your family and friends have access to appropriate support and information. Your key worker will be available as a point of contact from your diagnosis, through treatment and beyond (should you need it).

The role of your key worker

- To act as a point of contact to ensure that you receive high quality care.
- To act as a link between you and other members of your healthcare team, both in hospital and in the community, and to refer you to them as appropriate.
- To provide you with information about your diagnosis, treatment options and possible side effects.
- To offer support to you, your family and carers.
- To help you to obtain financial and welfare rights advice, as appropriate.
- To provide information about support groups and other organisations that you may find helpful.

Your key worker can meet with you in the out-patient department, the day ward or on the ward. If you would like to contact your key worker please use the number on the front of this leaflet and leave a message - we will return your call within 48 hours of your message being received (excluding weekends and bank holidays).

The team looking after you

The Lymphoma / CLL Team includes the following:

Consultants:

Your care will be managed by one of the following consultant hematologists who are specialists in the care and treatment of patients with lymphoma and / or CLL:

Dr. Matthew Ahearne, Dr. Rebecca Allchin, Dr Mohammed Althohami, Dr. Constantine Balotis, Dr. Ben Kennedy; Dr Sapna Ladani, Dr. Fiona Miall and Dr. Lesley Speed (Clinical Oncologist)

Lymphoma / CLL Clinical Nurse Specialists (CNS)

Your consultant will refer you to one of the Clinical Nurse Specialists: Tina Brooks, Lynda Beck, Blessy Thomas or Bethany O'Callaghan who are all registered Nurses with experience in the care of patients with lymphoma and CLL

There will also be Specialist Registrars involved in your care - these are doctors who are undergoing specific training within Haematology to become consultants within this field.

Multi-Disciplinary Team (MDT)

The MDT is a team of healthcare professionals with the necessary skills to diagnose and treat patients with lymphoma and CLL. The MDT meets to ensure that each patient receives the most appropriate care suitable for them as an individual.

The members of the lymphoma MDT include:

- consultant haematologists who are specialists in lymphoma and / or CLL
- clinical nurse specialists (key worker) who provides you with support, advice and information about your disease.
- a consultant pathologist who is responsible for determining what your diagnosis is.
- a consultant radiologist who is responsible for interpreting your scans.
- the MDT co-ordinator who ensures appropriate documentation is available for the MDT meetings and is responsible for letting the team know the decisions reached collectively by the MDT.

Decisions made about you at the MDT meeting will be shared with you and discussed at your next clinic appointment.

As a team we will always involve you in any decisions about your care. This will include offering you the opportunity to take part in clinical research trials (if currently available and appropriate for you). You and your GP will receive a letter from the team soon after diagnosis to ensure you have a record of these decisions.

An individualised plan of care will be agreed with you and explained by your doctor and CNS (key worker) and will be documented in the letter sent to you and your GP. If you would like a separate written treatment plan then please let us know.

Collecting your outpatient prescriptions

- Please wait for the pharmacy to call you before you or your nominated person comes to collect
- Contact Trust-Med Pharmacy on 0116 254 1446 if you have any queries
