

Going home after biliary stent insertion

Information for Patients

Leaflet number: 575

Version: 5

Hepatobiliary & Pancreatic Services

Produced: Dec 2021

Review: Dec 2024

You have had a biliary stent inserted, to relieve the jaundice that you had been admitted to hospital with. If you experience any of the following symptoms:

- A temperature or fever
- Dark urine and pale stools
- Severe abdominal pain
- Severe itching

Or

- If you feel that your jaundice is settling down or is returning,

then please contact your GP or Hepatobiliary Specialist Nurse (Key Worker) as soon as possible.

For all enquiries after going home from hospital use the contact details on the red business card you will be given before you go home.

If you need to speak to a member of the Hepatobiliary and Pancreatic Nurse Specialist Service, contact them using the details on the card they will have given you.
